

"The 4-H LIFE visits are like another world. You're able to relax, love and laugh again."

**Incarcerated Mother
4-H LIFE Program Participant**

What is the University of Missouri Extension 4-H LIFE Program?

The University of Missouri (MU) Extension 4-H Living Interactive Family Education (LIFE) Program is a family strengthening program that addresses the needs of children of incarcerated parents.

The overall objective of the 4-H LIFE Program is to promote a strong, healthy, and nurturing family environment for children of incarcerated parents, while helping incarcerated parents and trained 4-H volunteers become positive role models and mentors.

The program has three, interwoven components focused on specific audiences/groups:

- Parenting skills classes and planning meetings for the incarcerated parents
- 4-H club meetings that unite children with their families inside the prison visiting room

These three components are designed to create stronger parent-child bonds, improve the quality of prison-based family visits and increase youth decision-making and communication skills. Incarcerated parents are required to participate in weekly parenting and leadership and planning meetings in order to qualify for the program. The 4-H LIFE club meeting includes an official youth-led business meeting and parent-led 4-H projects. Afterwards, program staff and parents apply lessons learned into the next month's meeting plan. Children of offenders who are involved in 4-H LIFE are also enrolled as members of county 4-H programs and are mentored by 4-H volunteers.

How did the program start?

The Missouri 4-H LIFE program was originally developed in late 1999 at the Potosi Correctional Center in response to caregivers' requests for meaningful family interaction during prison visits. Since that time, the founding extension faculty and small teams of volunteer mentors have adapted the pilot program for fathers to include two women's prisons and several more male prisons.

Program Goals

Short term goals include the following:

1. Offenders and their children will improve their relationship.
2. Offenders and their children will experience increased satisfaction during prison visits.
3. Children's short term life skills will increase.

These short-term goals lead to long term goals of improved family and community reintegration; ultimately leading to a reduction in intergenerational incarceration.

"I've been locked up for six years. This is the only program I have ever been in that lets me apply what I am learning in parenting class."

**Incarcerated Father
4-H LIFE Program Participant**

Program Outcomes

The original MU Extension 4-H LIFE Program in Potosi focused its evaluation efforts on assessment of the life skills of the children of offenders. The evaluation was conducted by Dr. Elizabeth G. Dunn and J. Arbuckle. They concluded that participating youth appeared to have statistically significant life skill gains related to problem-solving, communication and self-esteem.

Current Evaluation: *Mixed Method Qualitative*

The MU Extension 4-H LIFE program is partnering with the Missouri Department of Corrections, the University of Missouri Campus Institutional Review Board and evaluation consultant Dr. Joyce Arditti, VA Tech, to implement a rigorous study of 4-H LIFE Program outcomes. This 30-month research study is designed to assess the correlation between parent-child-family relationships and successful offender reentry.

Since August 2008, measures of parenting stress, co-parenting, social support and prison visit satisfaction data have been collected from approximately 100 subjects via:

- offender & caregiver interviews (control and program groups, male and female)
- corrections staff interviews (three data collection sites)
- 4-H program staff focus groups

Preliminary Findings

Child Impact:

- Improved decision-making skills
- Increased communication skills

Parent Impact:

- Improved parent-child relationship
- Improved parenting skills and parenting competence

Caregiver Impact

- Reduced stress during prison visits; increased satisfaction with family visits
- Improved co-parenting behaviors with the incarcerated parent

The University of Missouri Extension will benefit from this study as it will be seen as a national leader in documenting the impact of high need outreach programming for an underserved population. Benefits for participants include a safe outlet to discuss and process their situation as well as having the knowledge that their contribution may result in more effective contact between incarcerated parents and their family members.

Youth life skill surveys will be administered in spring 2010. All final research reports will be released nationally in mid-2011.

“There have been 2,000 parent-child visits since the 4-H LIFE Program began... These families are getting to interact in a way that they’ve never been able to before.”

4-H Program Staff

Why Get Involved in the MU Extension 4-H LIFE Program?

With a focus on the future of America’s youth, the 4-H LIFE program is an integral part of improving Missouri’s rural, suburban and urban communities. In order for the program to be successful, each party involved, including incarcerated parents, children, caregivers, community members and corrections and program staff, must take ownership of their respective role.

Since the program’s inception in 1999, staff logged a total of 1,700 hours of direct service programming inside Missouri’s state correctional centers. Nearly 30% of staff time was spent facilitating 4-H and family-strengthening activities with the entire family. As the program continues to gain momentum, the number of individuals needed to serve in various roles will only increase. Here’s why you should get involved:

- Incarceration creates a significant identity interruption for parents that may result in abandonment of parenting roles and increased stress levels.
 - The 4-H LIFE Program gives incarcerated parents an opportunity to re-establish and strengthen their responsibilities to their children.
- The inability to interact regularly with their child has an impact on the offender’s own perceptions about being a parent.
 - Offenders who participate in the 4-H club meetings are better prepared to positively interact with their child and other family members in an engaged and respectful manner.
- Studies suggest prevention is cheaper than intervention.
 - A family incurs \$350,000 worth of cost during a typical drug offender’s 39 months of incarceration. Included is \$260,000 in pain and suffering.
January 2009, “New Mexico State Seminar Gives Legislators Facts on Impact to Families of Incarcerated Parents”.
- Research shows children of offenders tend to feel isolated and lack the resources needed to build healthy relationships with their parents.
 - Child participants of the 4-H LIFE program are encouraged to interact within their family unit as well as with other program participants and their communities, creating a sense of cooperation and unity.
 - Compared to traditional visitation settings, the 4-H LIFE club meeting provides an enhanced environment that is conducive to more positive, personal visits among the offender, the child and the caregiver.
 - Children who participate in 4-H LIFE tend to view their incarcerated parent in a positive leadership role.

"4-H LIFE visits are 'normal' and allow me to be the mother my children need."

Funding

The MU Extension 4-H LIFE Program is funded primarily with USDA Children, Youth and Families at Risk grant funds (2006-2011). The program is also supported by University of Missouri Extension (Human Environmental Sciences Extension, Kids in the Kitchen and the 4-H Center for Youth Development); the Missouri 4-H Foundation (2008-09); the Missouri Children's Trust Fund, the Missouri Department of Corrections Offender Canteen Funds and, effective Fall 2010, the Office of Juvenile Justice Programs and the National 4-H Council.

"I think as far as 4-H goes, since it focuses on the family...it helps focus on relationships...the triangle is there."

Staff Member
Missouri Department
of Corrections

Program Model

The 4-H LIFE model is based on the principles/foundations of positive youth development that occurs from an intentional process that promotes positive outcomes for young people by providing opportunities, relationships and the support to fully participate. Positive youth development takes place in families, peer groups, schools, neighborhoods and communities.

Experiential Learning Model

"Learning by doing" is a hallmark of all 4-H youth development programs. This hands-on approach helps youth explore new areas of inquiry, learn new concepts and develop life skills. The model is based upon the concept of "Do, Reflect, Apply."

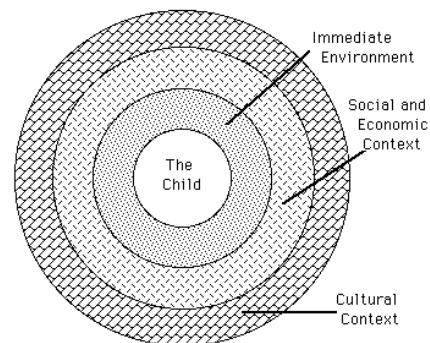

The National 4-H Council outlines four essential elements needed for youth to grow and thrive:

- **Independence:** Children in the 4-H LIFE program are given a chance to create a variety of projects, allowing them to demonstrate their motor skills and independence.
- **Belonging:** The 4-H LIFE club meeting encourages children to interact within their family and with other program participants of various ages.
- **Generosity:** Child participants in the 4-H LIFE club meetings are encouraged to share ideas, projects and leadership roles, creating attitudes and behaviors based on generosity.
- **Mastery:** Each 4-H LIFE club meeting provides new concepts, challenges and activities for youth to master.

Ecological Approach

Missouri 4-H uses Bronfenbrenner's ecological systems theory (1979, 1986, 2005). This model suggests that humans are impacted by multiple systems. These systems operate at the individual, family, community and societal levels. Researchers have concluded that effective positive youth development and prevention programs must operate at multiple levels of human ecology.

"I am deeply grateful for your help to our offenders and even more so to their children."

George Lombardi
Director, Missouri
Department of Corrections

Awards & Honors

Annie E. Casey Foundation Award

One of five programs to be awarded for innovative, exemplary and effective 4-H youth development programs that improve outcomes for rural, disadvantaged families. (2005)

National 4-H Program of Distinction

Accepted as a Program of Distinction, a description that reflects the high quality of 4-H youth development programs occurring in communities across the United States. (2005)

National Collaboration for Youth

Selected for inclusion in the National Collaboration for Youth compendium showcasing programs that demonstrate benefits for youth, families and communities. (2005)

National Priester Health Award

Awarded the National Priester Health Award, given for positive health outcomes of program participants, by Healthy People...Healthy Communities National Network for Health. (2004)

"I wish I would have implemented 4-H LIFE sooner. It is a much more valid program... The focus is on the family and they are in a learning state."

4-H LIFE Program Volunteer
Intern

Become an MU Extension 4-H LIFE Program Volunteer Mentor

University of Missouri (MU) Extension is currently recruiting volunteer mentors for the award-winning 4-H LIFE Program, a family strengthening program that takes provides youth with 4-H learning opportunities inside correctional centers where their parent resides as well as in the community where the youth and his caregiver live.

Volunteer assistance is needed for the in these ways:

- Co-teaching research-based parenting classes with another trained volunteer.
- Assisting incarcerated parents and Extension staff plan and implement fun 4-H activities during monthly family visits held inside the correctional center visiting room.
- Serving as a caring, 4-H mentor to the youth in the community where he lives.

Qualifications:

- Sincere desire to serve as a positive, long term mentor to children of offenders.
- Willingness to attend land grant Extension 4-H Volunteer Orientation and trainings.
- Willingness and ability to become a Dept. of Corrections Volunteer in Corrections (VIC).

Benefits:

- Research-based training provided at no cost.
- Volunteer in Corrections training given by the Department of Corrections at no cost.
- Rewarding life experience in working with underserved youth in your community.
